Who We Are

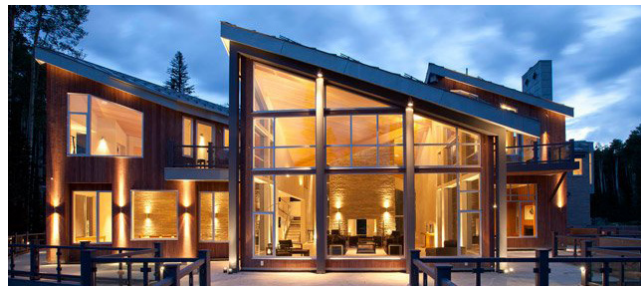

Hadley Homes LLC designs and builds energy efficient, high quality single family homes.

Our Promise

“Less is more” is founder Jim Hadley’s favorite mantra. At Hadley Homes we believe in the importance of living simply, and we think that hearty homes should be accessible to anyone. We build comfortable, affordable, environmentally friendly homes that will benefit the planet while fitting your family’s every need.

The How

We combine old fashioned craftsmanship with modern, proven, scientific building technologies to bring you the style of home you’ve always wanted.

Hadley Homes LLC
“Built simply for simple living.”

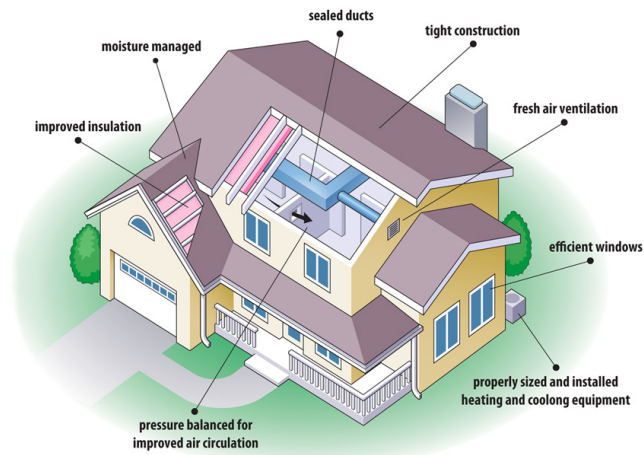

The Benefits of a Hadley Home

With our building techniques, you are guaranteed:

- The highest level of indoor air quality
- Proper insulation for zero drafts
- Smart thermostats for easier temperature management
- Lower monthly utility bills
- Easy-to-maintain heating and cooling units
- A cleaner planet
- Smartphone convenience electronic controls

Here's How We Take On Air Quality:

There are many ways to make homes more energy efficient, but Hadley Homes utilize every one.

We're Putting The Dream Back Into Dream Home

Hadley Homes is a family run business, so we understand how important finding a new home for your family is. That's why our process is all about comfort and convenience.

We will work with you for life to achieve your goals and to make sure your home is always performing at its highest capacity.

Our homes require less maintenance than the average house, and will save you thousands of dollars each year. Our builders have a minimum of 20 years experience and are committed to giving you the best home possible.

This is where the dream comes in. Not only will we help you create the home you've always wanted, but we will set new standards of building while we do it!

Contact us to learn more about building your new home today!

Home Variants

We can build your home in many ways, but here are three basic designs.

Type A: Maximum solar powered home

This structure has very little maintenance and will save you heavily on your electric bill.

Type B: Preferred heating and cooling home

This structure has optimized thermostats that are great for people who are not home all day every day.

Type C: Minimalistic eco home

This structure will cost you the least overall, and is made from entirely repurposed materials.

Are you ready for a
new home?

How about one that's comfortable,
affordable, and energy efficient?

Welcome to
